Full Bimini with good 360' view

Partially Closed Bimini

“What kind of boat should we buy?”

Everyone who imagines a dream boat has this question...

That is exactly what we want to introduce to you here; the best choice boat for your purpose, which is also stylish, extremely durable in terms of material structure, light and practical and equipped with the essential needs and comforts of a comparatively much larger boat.

Our boats are made using epoxy resin/PVC/glass/vacuum and infusion processes and are significantly lighter in weight compared to polyester laminated boats.

Thanks to the special epoxy Bio-Resins used, we do not have any osmosis problems or other structural fatigue issues with our hulls. Epoxy resin laminates are, so to speak, “indestructible” due to their strength.

The lighter weight compared to polyester laminated boats is of course also reflected in the fuel/battery consumption.

After 35 years of experience in Mega Yachts and Big Boat building, we are proud to have developed this brand new Day Cruiser/One Nighter family boat '**Whiskey 88**' and to now be able to introduce it to the global market.

The '**Whiskey Series**' will set the example of the pinnacle of this style of watercraft, in terms of price- quality and performance ratio.
